INORGANICA CHIMICA ACTA VOLUME 220, NUMBERS 1–2, JUNE 1, 1994

Contents

Metals in Organic Chemistry I

Preliminary Communication

Gold in organic synthesis
Part 2. Preparation of benzyl-alkyl and -arylketones via C–C coupling 1
J. Vicente (Murcia, Spain), M.D. Bermúdez and F.J. Carrión (Cartagena, Spain)

Articles

Regio- and stereoselective dimerization of 1-alkynes catalyzed by an Os(II) complex 5
P. Barbaro, C. Bianchini, M. Peruzzini, A. Polo, F. Zanobini and P. Frediani (Florence, Italy)

Synthesis of 5,6-dihydro-4*H*-1,3-oxazines from neutral and cationic platinum(II) nitrile complexes. X-ray structure of *trans*-$[Pt(CF_3)\{\overline{N{=}C(Ph)OCH_2CH_2CH_2}\}(PPh_3)_2]BF_4$ 21
R.A. Michelin, U. Belluco, M. Mozzon, P. Berin, R. Bertani, F. Benetollo (Padua, Italy), G. Bombieri (Milan, Italy) and R.J. Angelici (Ames, IA, USA)

Ruthenium complex catalyzed polymerization of OH or COOH group containing alkynes to give functionalized poly(acetylene)s. 35
I. Yamaguchi, K. Osakada and T. Yamamoto (Yokohama, Japan)

Hydrozirconation/transmetalation of acetylenic stannanes. New 1,1-dimetallo reagents. 41
B.H. Lipshutz and R. Keil (Santa Barbara, CA, USA)

Rhodium-catalyzed synthesis of 2(5*H*)-furanones from terminal alkynes and non-substituted alkynes under water-gas shift reaction conditions 45
T. Joh, H. Nagata and S. Takahashi (Osaka, Japan)

Influence of bulky substituents on the regioselective group-transfer reactions of diorganozinc compounds with *N,N'*-bis(2,6-di-isopropylphenyl)-1,4-diaza-1,3-butadiene 55
E. Wissing, K. van Gorp, J. Boersma and G. van Koten (Utrecht, Netherlands)

Asymmetric catalysis
87. Enantioselective allylation of 1,5-dimethylbarbituric acid with Pd catalysts and new optically active PN ligands 63
H. Brunner and J. Fürst (Regensburg, Germany)

Benzotriazole stabilized lithium intermediates as a route to the elaboration of N-substituents in amides 67
A.R. Katritzky, J. Köditz and H. Lang (Gainesville, FL, USA)

Silicon-containing carbene complexes
16. Intramolecular agostic stabilization versus nucleophilic addition to the 16-electron carbene complex $(CO)_4(L)W{=}C(NMe_2)SiPh_2Me$ 73
U. Schubert and M. Schwarz (Würzburg, Germany)

Photochemical reactions of transition metal organyl complexes with olefins
Part 10. Light-induced formal [5+2] cycloadditions at manganese 77
C.G. Kreiter, E.-C. Koch, W. Frank and G. Reiß (Kaiserslautern, Germany)

Chele- and anticheleselectivity
IV. Reaction-accelerating neighboring-group effects in the cross-coupling of vinylbromides with alkyl-transition metal reagents 85
T. Kauffmann, H. Nienaber and D. Stach (Münster, Germany)

The importance of phosphine-to-rhodium ratios in enantioselective hydroborations. 93
K. Burgess and W.A. van der Donk (College Station, TX, USA)

π-Bonded alkene and arene complexes of silver(I): an electrospray mass spectrometric study 99
A.J. Canty (Hobart, Australia) and R. Colton (Bundoora, Australia)

Preparation, properties and reactions of metal-containing heterocycles
Part LXXXIX. Metalla[*n*]- and metalla[*m.n*]orthocyclophanes as mediators for the synthesis of cyclic ketones 107
E. Lindner, W. Wassing, M.W. Pitsch, R. Fawzi and M. Steimann (Tübingen, Germany)

Elsevier Science S.A.

Synthesis of η^3-allyl–Pd complexes and subsequent formation of N-heterocycles via the reaction of a cyclometallated compound with conjugated dienes 115
M. Pfeffer, J.-P. Sutter, A. DeCian and J. Fischer (Strasbourg, France)

Synthesis, properties and reactions of sila-functional α-heteroatom-substituted organosilicon compounds 129
J. Yoshida, H. Tsujishima, K. Nakano and S. Isoe (Osaka, Japan)

A study of the reactivity of (methyl 2-acetamidoacrylate)tricarbonyliron(0) leading to a novel synthesis of β,β,β-trialkyl α-amino acids 137
J. Barker, S.L. Cook (Ellesmere Port, UK), M.E. Lasterra-Sánchez and S.E. Thomas (London, UK)

Electrophilic addition to styrylsilanes: sequential carbon–carbon bond forming reactions 145
C. Henry, R. Jüschke and M.A. Brook (Hamilton, Ont., Canada)

Ultrasound-promoted palladium-catalyzed carbonyl allylation by allylic alcohols with tin(II) chloride in non-polar solvents 155
Y. Masuyama, A. Hayakawa, M. Kishida and Y. Kurusu (Tokyo, Japan)

1,1-Organoboration of tri-1-alkynyltin compounds: novel triorganotin cations, stannoles, 3-stannolenes and 1-stanna-4-bora-2,5-cyclohexadienes 161
B. Wrackmeyer, G. Kehr and D. Wettinger (Bayreuth, Germany)

Reactions of benzocyclobutene chromium complexes with carbon, nitrogen and oxygen nucleophiles: nucleophilic addition and unexpected proximal ring opening reactions. 175
M. Brands, H.G. Wey, R. Goddard and H. Butenschön (Mülheim an der Ruhr, Germany)

Hydroformylation of alkenes and alkynes using a heterobinuclear Rh–W catalyst. 187
R.S. Dickson, T. De Simone, E.M. Campi and W.R. Jackson (Clayton, Vic., Australia)

Dirhodium(II) tetrakis[*N*,*N*-dimethyl-2-pyrrolidone-5(*S*)-carboxamide]. Structural effects on enantioselection in metal carbene transformations 193
M.P. Doyle, W.R. Winchester (San Antonio, TX, USA), S.H. Simonsen and R. Ghosh (Austin, TX, USA)

Reactivity of allene at phosphine-bridged di-iron centres: X-ray crystal structures of $[Fe_2(CO)_5\{\mu\text{-}\sigma,\eta^3\text{-}C(O)C(CH_2)_2\}\text{-}(\mu\text{-dppm})]$ and $[Fe_2(CO)_4\{\mu\text{-}\eta^3,\eta^{3'}\text{-}(CH_2)_2C_2(CH_2)_2\}(\mu\text{-dppm})]\cdot Et_2O$ 201
S.A.R. Knox, D.A.V. Morton, A.G. Orpen and M.L. Turner (Bristol, UK)

Stereoselective aldol addition reactions of Fischer carbene complexes via electronic tuning of the metal center for enolate reactivity. 215
W.D. Wulff, B.A. Anderson, A.J. Toole and Y.-C. Xu (Chicago, IL, USA)

A study of the reactivity and structure of cyclic α,β-unsaturated Fischer-type carbene complexes 233
E. Licandro, S. Maiorana, A. Papagni, A. Zanotti Gerosa, F. Cariati, S. Bruni, M. Moret (Milan, Italy) and A. Chiesi Villa (Parma, Italy)

Bite angle dependence of the rate of reductive elimination from diphosphine palladium complexes 249
J.M. Brown and P.J. Guiry (Oxford, UK)

Direct nitration of aryl groups σ-bound to ruthenium(II). 261
G.R. Clark, C.E.L. Headford, W.R. Roper, L.J. Wright and V.P.D. Yap (Auckland, New Zealand)

Labeling studies of some carbonylation reactions of styrene with cationic palladium complexes 273
G. Consiglio, S.C.A. Nefkens and C. Pisano (Zurich, Switzerland)

Optically active β-ketoiminato manganese(III) complexes as efficient catalysts in enantioselective aerobic epoxidation of unfunctionalized olefins 283
T. Nagata, K. Imagawa, T. Yamada (Chiba, Japan) and T. Mukaiyama (Tokyo, Japan)

Synthesis of symmetric and unsymmetric 1,4-bis(*p*-R-phenylethynyl)benzenes via palladium/copper catalyzed cross-coupling and comments on the coupling of aryl halides with terminal alkynes. 289
P. Nguyen, Z. Yuan, L. Agocs, G. Lesley and T.B. Marder (Waterloo, Ont., Canada)

The synthesis and reactions of A-ring aromatic steroid complexes of manganese tricarbonyl 297
K. Woo, G.B. Carpenter and D.A. Sweigart (Providence, RI, USA)

Preparation of η^1-1,3-dienyl, η^1-1,2-dienyl and η^3-cyclobutenone complexes via reactions of transition-metal carbonyl containing anions with allenic electrophiles 305
H.L. Stokes, T.L. Smalley, Jr., M.L. Hunter, M.E. Welker (Winston-Salem, NC, USA) and A.L. Rheingold (Newark, DE, USA)

Chemoselective functionalization of zirconacyclopentenes 319
K. Aoyagi, K. Kasai, D.Y. Kondakov, R. Hara, N. Suzuki and T. Takahashi (Okazaki, Japan)

Bicyclic carbo- and heterocycles from an allylidene complex and cyclic 1,3-dienes by tandem cyclopropanation/Cope rearrangement. 327
H. Fischer and T. Froneck (Constance, Germany)

Investigation of the dithiocarbamate-induced coupling of allylidene and carbonyl ligands on a tungsten center 335
M.F. Asaro (Princeton, NJ, USA), A. Mayr (Stony Brook, NY, USA), B. Kahr and D. Van Engen (Princeton, NJ, USA)

Note

N^1,N^7-expeditious dialkylation of cyclen (1,4,7,10-tetraazacyclodecane). An astonishing reactivity of cyclen tricarbonyl molybdenum and chromium complexes 347
V. Patinec, J.J. Yaouanc, H. Handel, J.C. Clément and H. des Abbayes (Brest, France)

Conference Calendar 349

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
